

Remote Mobile Fire Robot

Option: V-Blade fitted with Easy connection

V-blade

The V-blades 3 hydraulic settings – V-shape, straight right / left plow and Y-shape - allow it to clear effectively even in narrow areas and on slopes while the operator is on safe ground and at a distance. The blade has a clearance width of 1,280 - 1,490 mm, depending on position.

1. For use under fire operation as heat shield
2. Cleaning path for easy access
